Paid Total of \$8218, portion						report using Federal and State
owed by Ian Gabos						information
Mortgage- No monies were offered by Ms. Herrman. One might have expected an offering of 25% or \$500	0	\$ 5,000.00	\$5,000.00			There was precedent for support form Ms. Hereman prior to marriage 1 did not explicity request equal support as I
for the year and 75% paid by lan Gabos based or disparity of incomes 30% higher for E.Herrman.	5 -					wished to respect her desire to pay off loans. Heft support up to her discretion expecting some help which did not occur. I could have reasonably anticpated 25% participation in view of her higher income
						while I paid 75%.
				1		
Amounts of Utilities, Garbage,						These amounts are dismissed from the
Cable, Electric, Home Owner's Cost,						conversation per Ian Gabos'
Groceries etc. not being considered.						recommendation as an expression of
						goodwill to expedite the process. It is my view that the support for Electric and
						Cable by E. Herrman roughly offsets these
	`					items.

See separate page regarding tax discussion. Information per Mr. Brad Jadloweic CPA. Total tax responsibility of \$8218 was paid by E. Herrman. \$2653 represented sole responsibility of Ms. Herrman for Pine School Dist. Thus it is necessary to subtract \$2653 representing local school tax for Pine Township which was owed solely byMs. Herrman as it was not taken out her paychecks. This leaves \$5565 representing Federal and State tax due for both. As Ms Herrman had more earnings her deductions would be proportionally higher for Federal and Pa taxes as is demonstrated in tax report on page 31 of 50. Her income per page 31/50 is 29.6% higher. Ian did not owe anything for local school tax it was deducted from his paycheds.

Regarding the wedding gifts which E. Herrman removed from home independently, the value based on receipts at the time of wedding was \$5063 (Half of which is \$2653.) Ian does not want the gifts, only the

Regarding the wedding gifts which E. Herrman removed from home independently, the value based on receipts at the time of wedding was \$5063 (Half of which is \$2653.) Ian does not want the gifts, only the fair equity. E.Herrman took owership of the gifts independently and will be responsible for them. If more than half of the value noted above is obtained by her action on gifts she may keep it.

Likewise the dog was taken without mutual agreement but the value of the dog is not entered into the discussion per request of lan Gabos again a gesture of goodwill.

Likewise the dog was taken without mutual agreement but the value of the dog is not entered into the discussion per request of lan Gabos again a gesture of goodwill.

*There was a precedent of support for the mortgage but I did not request 50% support as it was my desire to honor the intention of Ms. Herrman to divert those funds to pay off loans. But neither did I dismiss some responsibility. It was left to her discretion. The mortgage value for 11 months of around \$20,000 is obviously aconsiderable. One perhaps could have envisioned 25% support or \$5000 through the year given income that was 30% higher.
